

Make your sustainable housing and mobility projects a success

Climate protection concerns us all

Let's act together now

The government offers housing subsidies and a range of support measures to encourage energy-efficient renovation and sustainable construction of housing, to promote heating systems using renewable energies, to encourage investment in photovoltaics and to facilitate the purchase of electric vehicles, as well as the installation of charging stations:

- Klimabonus grants  Klimabonus
- social top-up
- climate loan

Luxembourg municipalities, energy suppliers and the fonds nova naturstrom support you to ensure the success of your projects.

Personal, neutral and free advice

To find out more about the available support and to get your project off the ground, **make an appointment with your Klima-Agence advisor today!**

An advisory session can be held at your home, by videoconference or by telephone.

This service is financed by Klima-Agence and your municipality.
